MTH

WALVOIL Multifunction Handle

The new MTH handle has been developed by WALVOIL to combine the requirements of ergonomics and functionality for different mobile applications. The shape of the handle makes it suitable for an intensive use, ensuring high levels of comfort for the operator.

The grip can be configured with a high number of push-buttons (up to 12) and proportional roller (up to 5), giving the operator the possibility to control the complete machine functionality just with one hand.

The LEDs offer to the operator a quick and simple visual feedback about the status of the system.

Configuration example

For further configurations please contact our Sales Department
