Walvoil Launches Virtual Platform to Explore Product Offerings

Walvoil has launched a virtual platform on its website to provide an immersive experience in which visitors can learn more about the company and its products. The company has utilized the platform for webinars and training sessions, and is now making it accessible through its website for anyone who may be interested.

[Accessible from Walvoil's website](#), the platform currently highlights hydraulic, electronic and mechatronic solutions for the main sectors it supports, including construction, agriculture, industrial vehicles, lifting and transport. Also highlighted is the Walvoil Test Department, enabling visitors to learn more about the company's R&D efforts.

The company plans to add more information and experiences to the platform in the future.

"Expect a constantly evolving environment, a space that grows and gradually will tell something more about the Walvoil Group, in Italy and around the world," said Andrea Ferrari, Walvoil Global Sales & Marketing director, in the company's press release announcing the new virtual platform. "An accessible space, a technology that, together with our partners, we have wanted and made simple that allows a more effective communication and interaction not only with our customers but also with the different Walvoil branches."

Walvoil's new virtual platform will be an evolving environment in which visitors can learn more about the company's products and development efforts.
